Randy,
EDAAC ECS understands the risk of taking Legato Networker one day before the scheduled PSR, and understands that we can not expect Landover to be responsible for non-documented install issues prior to the PSR.
However, due to the fact that we have to do a reinstall of the software anyway (due to the complete rebuild of the root disk on MSS04), it would be a waste of time to install an old version that currently does not work and has not been supported by SUN or Legato here at EDC. Therefore, due to the tight schedule and the importance of back-ups at EDAAC, could you please fed express the package tomorrow morning, as we discussed.
Thanks, Randy!
